

Health and other organisations can share data and information within the Health Data Portal using a data asset.

To be able to submit a data asset in the Data Portal, a user needs to have the role of *Submission Uploader*.

To submit a data asset in the Data Portal:

1. Open the Data Portal through [Health Data Portal](#).
2. Log in using the information provided in the *Initial Access to the Health Data Portal* QRG.

The Data Portal Home screen will display.

3. From the Home screen, select **New** and select **Asset for Submission** from the list that displays.

The Data Asset Details screen will display and the details of the new data asset can be completed.

4. Complete the fields on the screen as described below.

\* indicates a mandatory field.

Field	Description
Title*	Enter a title for the new data asset. This should reflect the content of the data asset. The title is important as it will be used by others when they search for the data asset.
Description*	Enter a description of the data asset. This would generally contain information regarding the content and purpose of the data contained within the asset.

Field	Description
Folder*	Select <input checked="" type="checkbox"/> and select the folder that relates to the data you are submitting. Only users within your organisation with access to this folder will be able to see your data asset in the Data Portal once it is submitted.
Sub-Folder	Select the down arrow <input checked="" type="checkbox"/> and select the type of data being submitted.  This field will only display, if applicable, once a folder is selected in the <b>Folder</b> field.
Sub-Sub-Folder	Select the down arrow <input checked="" type="checkbox"/> and select the type of data being submitted.  This field will only display, if applicable, for certain business areas once a sub folder is selected in the <b>Sub-Folder</b> field.
Data Period	If applicable, enter the start and end date for the time period the data being submitted relates to. The date needs to be entered in the format dd/mm/yyyy.

5. To upload the applicable file to the data asset, select **Add File**.

The Upload Files dialog box will display.

6. Select **Choose File(s)**.

The Windows dialog box will display.

7. Locate the file you wish to upload to the data asset (e.g. your PDF report).
8. Select the file and then select **Open**.

The Data Assets Details screen will display and the selected file will now appear in the **Files** section of the screen.

File Name	Last Modified	Description	Actions
Health Data Portal Organisation Record Changes for Health Services (DOCX)	19Dec2018 12:39		V1
22 KB (Microsoft Word)			

You can add a description of the file in the **Description** field, if needed.

9. Once a file has been uploaded to the data asset, there are several actions that can be performed on the file.

Button	Description
	Select this button under <b>File Name</b> to download and view the file. A pop up will appear in the bottom left-hand corner of the screen and you can open the file from here and save it as required.
	Select this button under <b>File Name</b> to replace the file with another file if you have uploaded it incorrectly.
	Select this button under <b>Actions</b> to view the file's previous versions. There will be no previous versions of the file at this stage.
	Select this button under <b>Actions</b> to remove the file from the data asset.
	Select this button under <b>Actions</b> to view the file's download history. There will be no download history for the file at this stage.

10. To save the details of the new data asset, select [Save](#).

11. Select either [Change Status](#)  or the workflow progress bar and, in the Change Data Asset Status dialog box, in the **Action** field, select ☒ and select the required action.

The available actions are:

- **Request Review** – Select this action to send the data asset to someone within your organisation for review.
- **Request Approval** – Select this action to send the data asset to someone within your organisation for approval.
- **Request Interim Processing** – If you are a Reviewer as well as a Submission Uploader, you can select this action to send the data asset to the external *Data Receiver* for review prior to it going to your CEO or their representative for approval. This process is known as *Interim Processing*.

- **Remove Data Asset** - Select this action to remove the data asset from the Data Portal (it may have been created in error).

If you have the ability to approve data asset submissions as well as create them, you will also see the *Approve for Submission* option in the action list. This allows you to approve the data asset and submit it directly to an external data receiver for viewing or processing.

12. Add comments regarding the data asset in the **Comment** field if required.

13. One of the following options can be selected:

- To send the data asset on for review, select [Request Review](#). See the *Review a Data Asset Submission* QRG for the next step in the process.
- To submit the data asset for approval, select [Request Approval](#). See the *Approve a Data Asset Submission* QRG for the next step in the process.
- To send the data asset to the external *Data Receiver* for initial review prior to sending it to your CEO or their representative for approval, select [Request Interim Processing](#).
- To remove the data asset from the Data Portal (it may have been created in error) select [Remove Data Asset](#).

To save the data asset as a draft select

The data asset has now been completed and submitted to the next stage of the data asset submission process.
