

Currently, there are 22 indicators (grouped by *Process of care* or *Outcome*) that are reported on by health services as part of the submission of the six-monthly nKPI report through the Health Data Portal.

When analysing nKPI results through the various *QLIK Indigenous Health Dashboards*, users are able to use the different sheets contained within the Dashboard to analyse data trends for a particular health service and assess whether or not performance over time for particular indicators is improving.

The table below details each of the indicators that need to be completed by health services when submitting their nKPI report and whether a *higher* ↑ or *lower* ↓ result is the preferred outcome for each of these indicators (or for each result band for the *Outcome* indicators).

nKPI	Title	Indicator Type	Preferred Outcome
<b>PI01</b>	Birthweight recorded	Process of Care	↑
<b>PI02</b>	Birthweight result	Outcome	High - ↓ Normal - ↑ Low - ↓
<b>PI03</b>	Health assessments 0-14 yrs	Process of Care	In Person - ↑ Telehealth - ↑
<b>PI03</b>	Health assessments 15-65 yrs	Process of Care	In Person - ↑ Telehealth - ↑
<b>PI05</b>	HbA1c recorded	Process of Care	Previous 6 months - ↑ Previous 12 months - ↑
<b>PI06</b>	HbA1c result	Outcome	≤ 53 mmol/mol - ↑ > 53 to ≤ 64 mmol/mol - ↓ > 64 to <86 mmol/mol - ↓ ≥ 86 mmol/mol - ↓
<b>PI07</b>	Chronic Disease Management Plan	Process of Care	In Person - ↑ Telehealth - ↑
<b>PI09</b>	Smoking status recorded	Process of Care	↑
<b>PI10</b>	Smoking status result	Outcome	Current - ↓ Ex - ↑ Never - ↑
<b>PI11</b>	Smoking status result – new mothers	Outcome	Current - ↓ Ex - ↑ Never - ↑
<b>PI12</b>	Overweight or obese	Process of Care	Obese - ↓ Overweight - ↓
<b>PI13</b>	First antenatal care visit	Process of Care	Before 13 weeks - ↑ 13 to 19 weeks - ↓ 20 weeks or later - ↓

nKPI	Title	Indicator Type	Preferred Outcome
			Timing not recorded - ↓ Did not attend visit - ↓
PI14	Immunised against influenza		↑
PI15	Influenza immunisation Type 2 diabetes/COPD		↑
PI16	Alcohol consumption recorded		↑
PI17	AUDIT-C result		<3 - ↑ <4 - ↑ ≥3 - ↓ ≥4 - ↓
PI18	Kidney function test – type 2 Diabetes		↑
PI18	Kidney function test – CVD		↑
PI19	Kidney function test - eGFR result		<15 - ↓ ≥15 <30 - ↓ ≥30 <45 - ↓ ≥45 <60 - ↓ ≥60 <90 - ↑ ≥90 - ↑
PI19	Kidney function test - ACR result (Male)		<2.5 mg/mmol - ↑ ≤2.5 to ≤25 mg/mmol - ↓ >25 mg/mmol - ↓
PI19	Kidney function test - ACR result (Female)		<3.5 mg/mmol - ↑ ≤3.5 to ≤35 mg/mmol - ↓ >35 mg/mmol - ↓
PI20	CVD assessment risk factors		↑
PI21	Absolute CVD risk assessment recorded		Low risk - ↑ Moderate risk - ↓ High risk - ↓
PI22	Cervical screening		↑
PI23	Blood pressure recorded		↑
PI24	Blood pressure result		↑
